Why Dafzo??

Dafzo is first ever global shipping platform based on P2P Blockchain system.

Problem:

Today fast-growing tech world buyer shop by clicking few buttons on a mobile telephone but still there is a geographical restriction that does not allow buyer to purchase goods of choice from different countries, most of the international seller refuses to dispatch to requested region. Let say, buyer, stay in Asia and want to order from e-commerce stores like Amazon UK or the USA, an electronics product which is not yet available in buyer's country. Sellers on such e-commerce platform and local store do not ship Internationally and on E-global stores product may be available but at much higher price and additionally, the buyer also needs to pay 2% roughly International card transactions fee and fixed International shipping of store choice.

Solution:

Dafzo P2P Blockchain platform and ERC 20 Ethereum cryptocurrencies token, through smart contract resolves this problem. Dafzo not only revolutionizes and democratize the Global e-commerce logistics and freight forwarding system but also help **custodian & partners** to earn through P2P network.

Dafzo with its unique Smart contract system protects buyer package until delivery of its doorstep. Dafzo smart contract system protects buyer against any tampering or loss of goods while at the hand of custodians or against damage/loss during goods in shipments through Dafzo partner insurance. Dafzo also provides buyer logistics freedom to choose from various international shipping options on different parameter i.e. economical or faster delivery, the buyer can choose as per its convenience.

What is Dafzo Mission?

To decentralised Global shipment by placing the power - entirely into the hands of global community-P2P

What Is Dafzo Vision?

To create a unique ecosystem built around the Dafzo token for P2P Global parcel forwarding system, without any geographical barrier, also to empower the community through a custodian programme for innovation, decentralization and efficiency.

Dafzo also aims to create a token market for the world, especially focusing on cryptocurrencies friendly countries EU, Asia and especially India, democratizing funding for new Blockchain

why dafzo is different

- First ever truly P2P logistics forwarding system that allows user to shop from anywhere or any store in the world.
- Dafzo creates a system of trust and safe passage that allow buyer to avoid 2-3% International transaction fee.
- Dafzo allows contributors to earn through P2P platform as a custodian.
- Dafzo team has have 5+ years of experience & provide one of most low cost parcel forwarding system, within city, in India.
- Dafzo in near future Aim to have Direct partnership programmes with E- Store so consignment can move directly from storage house to buyer doorstep.

NISCHAL ARVIND SINGH © COPYRIGHT 2017 FOR IPFORSTARTUP.COM

Projects. Dafzo ERC20 compliant cryptocurrencies Smart tokens also act as a gateway to cryptocurrency markets for EU Blockchain companies and a go-to place for launching new ones, Dafzo P2P platform will help prospective startups build a legal framework for digital assets and execute successful funding campaigns. Dafzo in the near future allows to switch from ETH to EUR or US dollars in moments through Estonia e residency programmes partnership and other such countries friendly government programmes

Dafzo ICO key features

Features	Dafzo	Traditional
Dafzo Logistics Ecosystem	Dafzo is P2P Logistics ecosystem that support borderless shopping irrespective of seller does International shipping or not.	Traditional Logistics System Doesn't support such system.
Smart Contracts	Dafzo smart contracts allow every party to secure its transaction data and commercials. Dafzo is decentralized system that exists between all permitted parties, there's no need to pay intermediaries (Middlemen) and it saves you time and conflict. The smart contract ensures the safety of buyer value of parcel all the time till receiving delivery.	Traditional Logistics System Doesn't support such system. In fact, logistics company, biggest drawback packages lost in transits or untraceable
Blockchain	Dafzo decentralised system establish integration between all parties for real time tracking and live status of parcel. Dafzo integration notary every movement on Blockchain and secure parcel from loss in transits.	Traditional Logistics System Doesn't have integrated system because of centralised system.
Liquidity	Dafzo Token designed for a high utility function, whether it used for shopping or International or local parcel shipment. Dafzo token has a daily utility function which creates regular demand and supply to token. Dafzo offers contributor/Investor liquidity in need of funds and benefits from its price volatility within the short term.	traditional investments offer no liquidity for investors, and capital is locked in for many years (in some cases 10 years+), until liquidation of the fund.
Zero International Transactions Fee	With Dafzo logistics ecosystem there is Nil International transaction fee on purchasing goods from different jurisdiction i.e. borderless shopping experience © with Dafzo.	Traditional Logistics System Doesn't support such system.
Earn Dafzo token From Custodian Programme	Dafzo local custodian earns from receiving and forwarding package. Anyone with a local address can become Dafzo custodian and start earning Dafzo coin. Custodian Dafzo coin at moment can be exchanged into local currency with Dafzo platform. In near future, the Dafzo token can be exchanged with cryptocurrency exchanges around the world.	Traditional Logistics System Doesn't offer opportunities for additional income.

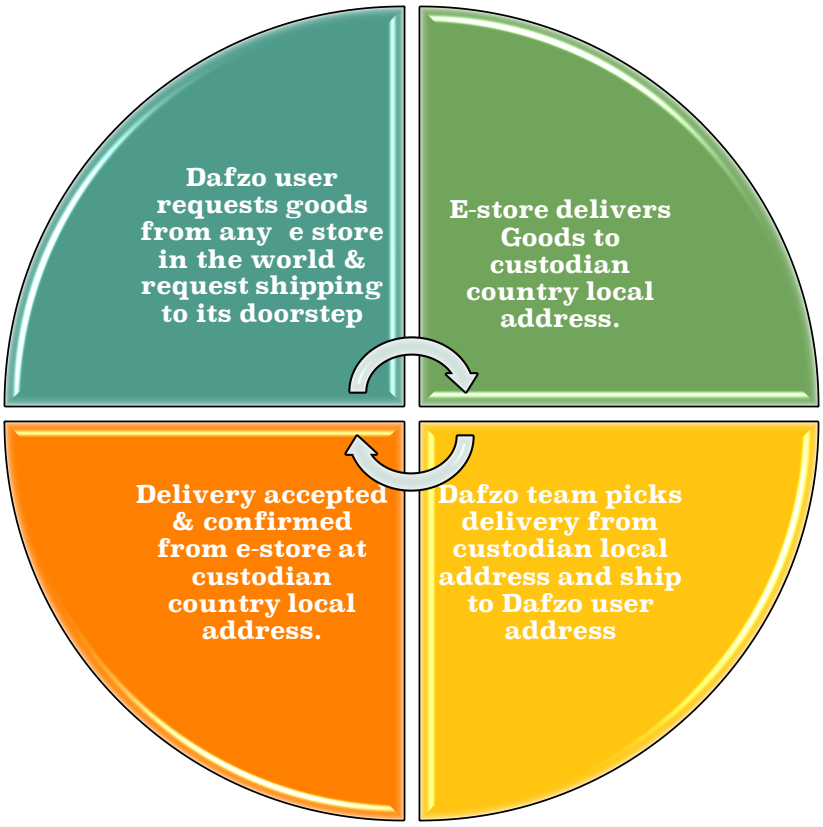
"How Dafzo works"

Dafzo is Global shipment company, under Dafzo Blockchain framework P2P lending the user or buyer will place order of its choice of store and deliver at custodian local address where our logistics partner will pick up the delivery for international shipment and deliver the goods at buyer door step.



Process includes Ethereum smart contract transaction with Dafzo token

Illustration 1:

Let say Mr Wang wants an iPhone X from USA store in Singapore, and Mr Wang places order through Amazon store, now Mr Wang will place a request on Dafzo decentralised network which will be accepted by the custodian (with local US address). Mr Wang orders and delivered to custodian local address, same time book international shipment. The custodian received the delivery and confirm, Dafzo logistics team will pick goods from custodian local address and deliver to Mr Wang doorstep. Mr Wang pays custodian to get a minimum fee and for International shipping through Dafzo tokens.

Illustration 2:

Let say Ms Christine wants the Ayurveda products to amount 100 USD from India to London, and Ms Christine will place a request on Dafzo decentralised network which will be accepted by a custodian (with local Indian address). Once request accepted by local custodians the Ms Christine transfers token to Dafzo for the value of 100 USD=200 Dafzo tokens and custodian fee, plus international shipment. The Dafzo transfers equivalent of goods amount of a custodian in local currencies and custodian order goods online and request delivery at custodian local address (same time 200 Dafzo token deducted from

NISCHAL ARVIND SINGH © COPYRIGHT 2017 FOR IPFORSTARTUP.COM

custodian deposit). The custodian received the delivery and confirm, and once delivery is confirmed Dafzo will pick goods from custodian address and deliver to Ms Christine in London. Local custodian deposit restores along with the minimum fee for custodial service.

The entire process is done on Ethereum smart contract ensuring everyone safety and security, every time custodian accepts consignment the number of goods value will be deducted from custodian deposit, the total consignment value accepted by custodian cannot be more than custodian deposit, it is strictly equal all time. If a custodian A has deposit 2000 USD =4000 token, he can only accept consignment to exact of 2000 USD or below. So, this way smart contract ensures the safety of user/buyer goods through the deposit. Entire process the buyer and custodian service/courier fee moves to escrow account till than task completed and confirms at one's end.

"Why we use Dafzo, many stores now have global store and ship worldwide."

That's true, but it's also true the global store doesn't offer International shipping all of its goods, further the cost is always higher on goods in such global e-commerce store and International shipping incur high cost. Most important how Dafzo is different from the current global store is the buyer packaged is always secured throughout and later on transit, the buyer doesn't need to pay an international transaction fee, Dafzo offer low-cost shipment than any other global store. Dafzo is always safer and comparatively cheaper than the existing system. It's a crowd power platform for P2P logistics on blockchain.

"What is custodian & partners programme."

Custodian for International shipment: Custodian & partners programme is one of the simplest ways of earning additional income through Dafzo. It's as simple as cutting a slice of a cake, contributor who wish to work with Dafzo in P2P decentralised platform for Global package forwarding system. Dafzo gives an opportunity for Contributor to become custodian and earn income on package forwarding. For becoming a custodian, a token purchaser or contributor need to express its interest and refundable deposit minimum of 2000 USD = 4000 Dafzo token with Dafzo, Dafzo for student's category minimum deposit is 500 USD =1000 token. The refundable deposit category for custodian programme is 2000 USD, 5000 USD & with an upper maximum limit of 10000 USD (*for corporate custodian business upper limit as of now is 1,00,000 USD)*. Custodian needs to choose refundable deposit, provide KYC, address proof and just simply start working. Anyone with Dafzo token can be custodian either you are a student, housewife, retired, or working, with Dafzo you have to just register, deposit and simply accept packages.

Custodian for within city consignment: Dafzo is the first service in the world that provides with city local community support for receiving parcel faster through its custodian programme. If receiver missed parcel delivery window, the parcel on request, left with a nearest local custodian for self-pickup or drop to receiver address in few minutes. Until Today Traditional Logistics System Doesn't supports such system.

Why contribute in Dafzo ICO:

The Dafzo ICO fund will be invested in further post-product stage Blockchain technologies and AI integration for better safe & transparent service.

Dafzo in the near future partner with global & national e-commerce and online store like Amazon, Ikea, Argos and more for reducing TAT in delivery Dafzo also expand its operation across the globe, initial to focus market for Dafzo is Asian countries, UK & USA. Dafzo will also introduces first ever AI based locker on a strategic location in each operating city for easy pickup and drop service through the year, 24x7, other than home service, to ensure economic benefits reach to both logistics companies and the end user.

The Dafzo opens overseas operations considering on traction in the market, fund to invest in such market, that help Dafzo grows their market size and traction in coming years. Nearly 30% -40% of Dafzo ICO initial fund will be invested in India & Asia emerging countries. We believe that investment in India and Asia are not high as compared to US/EU market as well as the market size of Asia is much larger than Europe altogether, that helps us to invest in more Asia with less fraction with much higher expected revenue.

Dafzo offers a unique solution to all online shopper without any geographical barriers. Its win win situation for all stakeholders either its online store, shoppers, local custodian, logistics companies, insurance or concern for contributor liquidity. The following can be seen as the key reason for contribution to Dafzo ICO:

User benefit of Dafzo cryptocurrencies token price index changes/listing exchanges in the near future with liquidity.		Dafzo distributes surplus profits as incentive for custodian partners.
Local community earns through Dafzo with almost nil effort, consider custodian as a partner, what is with companies like Uber, Airbnb.		Dafzo distributes surplus profits to contributor, such profits will be distributed among qualified token holder/owner.
Online shopping in any geographical location with International shipping to support, with Dafzo now shop borderless from anywhere in the world		Use Dafzo token for international shipping as well for other services with Dafzo partners (near future).
